EDUCATION

St. Edward's University — B.S. Computer Science, Software Development Concentration Expected May 2027
Relevant Coursework: Cybersecurity, Mobile Programming (iOS), Algorithms & Data Structures, Computer Architecture, Databases, Software Engineering
Honors: Scholastic Leadership Achievement, St. Edward's University (Fall 2025)

TECHNICAL SKILLS

Programming: Python, Swift, Kotlin, TypeScript, Java, C, C++, JavaScript, SQL, PowerShell, PHP
Frameworks & Tools: SwiftUI, FastAPI, React, LangGraph, PostgreSQL/pgvector, Docker, GitHub Actions, Git
Endpoint & Cloud: Microsoft Intune, Entra ID, Apple Business Manager, M365, Windows, macOS, iOS
ERP & Automation: NetSuite (saved searches, reports, roles, inventory records), Power Automate, Azure Functions
Networking: Cisco Meraki (wireless, switching, VLANs), Cisco IOS CLI, Cisco Secure Client VPN, packet capture
Security: Applied cryptography (AES, RSA, Diffie-Hellman, A5/1, hashing), access control, MDM hardening
Spoken Languages: English, French, Swahili (fluent); Spanish (conversational)

EXPERIENCE

University Co-operative Society - *Information Systems Intern; Austin, TX* Mar 2026 - Present

- Designed a Python Azure Function and Power Automate architecture to automate game-day inventory replenishment, passing all 6 initial-stage tests, and built the stakeholder pitch deck ahead of phased rollout
- Automated Shopify gift card processing with a Power Automate flow that extracts 16-character codes from HTML emails and deduplicates them via OData server-side filtering, eliminating manual data entry
- Remediated a kuando Busylight v2.5.x registry defect fleet-wide with a PowerShell script deployed via Intune
- Authored the iPad POS enrollment runbook after root-causing Automated Device Enrollment (ADE) failures, codifying sequencing rules for device naming, Entra group-membership sync, and ADE token sync timing
- Administer and secure ~400 Windows and Apple endpoints across 3 locations with Microsoft Intune, Entra ID, and Apple Business Manager, enforcing device supervision and group-scoped policies
- Administer NetSuite ERP: build saved searches and reports, manage user roles and permissions, and maintain item and inventory records
- Configure Meraki SSIDs, switch ports, and VLANs and Cisco IOS devices via CLI; troubleshoot via packet capture
- Restored iPad printing via an Intune AirPrint payload after finding Universal Print has no iOS client

PROJECTS

Coach K, AI Strength Coach | *Python, FastAPI, PostgreSQL/pgvector, LangGraph, React, Docker* Personal Project

- Built a LangGraph agent with RAG over a private textbook library (local embeddings, pgvector hybrid search) that writes periodized training programs with citations validated against retrieved sources
- Added Postgres-checkpointed memory; shipped React web and native iOS clients, Dockerized on DigitalOcean

Summoner's Duel, iOS Trading Card Game | *Swift, SwiftUI, SwiftData, Swift Charts* Academic Project

- Built a card game with an AI opponent, a 671-card roster from a REST API, and a SwiftData-backed deck builder
- Added Swift Charts duel analytics, haptics, and synthesized audio; cut the app from 1.3 GB to 44 MB; 64 tests pass

Crypto Toolkit | *Python, React* Security Project

- Implemented AES, RSA, Diffie-Hellman, and A5/1 from scratch (no crypto libraries) behind a React interface

Save Swap, Android Save Manager | *Kotlin, Android SDK, GitHub Actions* Open-Source Project

- Shipped an open-source Android app to find, import, and replace emulator saves, with auto-backups and CI builds

LEADERSHIP & ACTIVITIES

St. Edward's University - *Assistant Coach, NCAA Division II Women's Basketball; Austin, TX* Aug 2025 - Mar 2026

- Led practices and drills, produced scouting film analysis, coordinated team travel, and mentored student-athletes

Pure Ambition - *Coach; Austin, TX* Jun 2023 - Present

- Coach students in basketball and soccer; coordinate workouts and tournament schedules with families
